

WEATHERBOARDS

NSFP produces a traditional Tasmanian Oak weatherboard for the Tasmanian market which is prized for its unique character and traditional profile. It is generally sought as a replacement product on existing housing or as a new product to help keep in with the traditional character of the street.

NSFP's weatherboards are produced from high quality, sustainable hardwood timber for and are recognised for their beauty, strength, stability, workability and painting qualities. Made from above-ground durability Class 3 species, these weatherboards are traditionally painted and maintained to enhance the natural durability and life of the product.
